<b>Office Action Summary</b>	<b>Application No.</b> 10/556,125	<b>Applicant(s)</b> MEAGHER, EDWARD C.	
	<b>Examiner</b> GLORIA R. WEEKS	<b>Art Unit</b> 3721	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 23 September 2009.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

### **DETAILED ACTION**

1. This action is in response to the amendment and remarks received on August 11, 2009.

#### ***Continued Examination Under 37 CFR 1.114***

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 23, 2009 has been entered.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by McKean et al. (USPN 6,045,560).

In reference to claims 1-5 and 7, McKean et al. discloses a surgical fastener system comprising: a fastener including a base leg and a support leg, the base leg being selectively deformable and including at least one traumatic tip for piercing tissue, and at least one capillary 140 having a reservoir (cellulose material) therein for retaining a liquid (column 4 lines 13-30, line 67- column 5 line 4) such that the capillary is rupturable (penetrated by tip) with the deformation of the surgical fastener; a loading unit 135; and an actuator 132.

5.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over McKean et al. (USPN 6,045,560) in view of Trumbull et al. (USPN 5,263,629).

Regarding claims 6 and 8, McKean discloses a single liquid filled capillary on a base leg of a fastener. Trumbull et al. teaches a fastener that sequentially ruptures a first and second capillary 52, such that the first and second capillary 52 are on an external surface of the base leg

(figure 5 - *see figure 5 diagram of Trumbull et al.*). It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the surgical fastener of McKean to include a second capillary as suggested by Trumbull et al. for the purpose of treating a second layer of tissue sutured by the surgical fastener.

### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1-8 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations related to the claimed invention.
